April 1, 2019

Dear Valued Customer,

Your comfort, convenience, and peace of mind are important to us. Providing you with quality products and services has always been Husky's number one priority. With this commitment in mind, we are excited to announce we have merged with Tevis Energy.

Based in Westminster MD, Tevis Energy is a family-owned company that has been serving customers throughout the Baltimore area for over 85 years.

We chose to partner with Tevis for several reasons. First and foremost, they share our culture of honesty and integrity. Not only will their purchasing power help us keep our prices competitive, but an expanded fleet will help us serve you better, especially when demand for heating oil is high. We will also be able to offer our customers a wider range of energy services.

While there may be occasions when we dispatch a Tevis Energy vehicle to serve you, there will be no change to the way you order a delivery from Husky. Simply call the same number you always have or use our website to request a delivery online. Our location will remain in Columbia and Charlene, Lori, and I will still be the employees you talk to. Wade, Dave, Rich and Mike will continue to deliver fuel for Husky. As always, our goal will always be to reach you as quickly and efficiently as possible.

As part of this partnership we will be transitioning to a new software system April 1, 2019. That being said there will be minimal changes that will impact Husky customers. However, since credit card information is held in a vault and inaccessible to anyone, if you are a Husky customer setup with auto payments to credit card it will be necessary for you to contact our office after April 5th to provide us with your credit card information to be entered into the vault on the new system. This will alleviate any issues with future payments.

And, of course, please call us with any questions you may have -- we are here to help!

Thank you for your continued business. We look forward to serving you this season!

Sincerely,

Matt Pyzik, Regional Operations Manager
